MENU ITEMS

Revenue ex VAT and cost of sold units; the workbook column is Menu Master cost with packaging × units sold.

Item	Sold	S / C / W	Revenue	Cost	Margin	%	Workbook
Chicken Dynamite Burger	1	2/0/0	AED 36.01	AED 6.29	AED 29.72	82.5%	AED 6.29
Rawia Cane Karak	1	0/1/0	AED 26.98	AED 1.11	AED 25.88	95.9%	AED 2.32
Original Cane (incomplete)	4	0/0/0	AED 20.14	AED 11.32	AED 8.82	43.8%	AED 11.32
Rawia Cane Sauce (incomplete)	1	0/0/0	AED 16.19	AED 0.57	AED 15.62	96.5%	-
Classic Fries	1	0/0/0	AED 12.00	AED 1.74	AED 10.26	85.5%	AED 1.74
Tikka Paratha Roll	1	0/0/0	AED 7.00	AED 5.76	AED 1.24	17.8%	AED 5.76
Cane BBQ Burger + Fries + Strawberry Cane + Cane Sauce Combo (incomplete)	1	0/0/0	AED 5.40	AED 0.00	AED 5.40	100.0%	-
Blue Berry Cane (incomplete)	1	0/0/0	AED 1.50	AED 0.00	AED 1.50	100.0%	-
Strawberry Cane	0	0/1/0	AED 0.00	AED 0.00	AED 0.00	-	-

S / C / W = staff meal / complimentary / wastage servings (not in sold-item cost). Workbook reconciliation: app AED 25.11 vs workbook AED 25.11, difference AED 0.00.

STAFF MEALS, COMPLIMENTARY AND WASTAGE

Zero-revenue consumption: in the reserve and the operating result, not in sold-item COGS.

Use	Records	Cost	Missing costs
Staff meals	26	AED 12.58	none
Complimentary	13	AED 10.28	yes - total incomplete

UNRESOLVED ISSUES (4)

Date	Severity	Issue
2026-09-14	error	POS item "Cane BBQ Burger + Fries + Strawberry Cane + Cane Sauce Combo" (1 sold) is not mapped to a workbook item; its cost is missing.
2026-09-14	error	POS item "Blue Berry Cane" (1 sold) is not mapped to a workbook item; its cost is missing.
2026-09-14	warning	Ice: consumed 0 with no usable cost (qty_invalid, unit_unknown).
2026-09-14	warning	Packaging not defined – Rawia Cane Sauce: consumed 1 serving with no usable cost (packaging_undefined).

ASSUMPTIONS

Default settings (not yet saved) · 2026-09-14

- Currency AED; business dates in Asia/Dubai time.
- Consumption = quantity served × recipe quantity per serving; reserve = consumption × recipe-unit cost from the costing version shown.
- Staff meals and complimentary items consume stock at zero revenue. Discounts reduce revenue only.
- Refunded orders default to prepared (stock consumed); voided orders default to not prepared (no consumption), unless recorded otherwise per order.
- Cane Karak: AED 23 per prepared batch (default 1 per day with Karak sales), no per-cup recipe cost; per-cup packaging charged; batch cost allocated to the BOM batch recipe where available.
- Packaging from the workbook recipe on every channel.
- VAT 5%, included in POS prices (unconfirmed); taken from the POS VAT column.
- Channel commissions: talabat 32% (unconfirmed), noon 19% (unconfirmed), keeta 25% (unconfirmed). Card fees: not set (shown as unavailable).
- Fixed costs spread evenly over the calendar days of the month: Rent, Salary, SEWA, Oil, Wifi, Pest Control, Grease Trap Cleaning, Cargo, Lemon Syrup, Floor Cleaner, Glass Cleaner, Oven Cleaner, Dishwasher soap, Handwash; excluded: Cane Sauce, Original Sauce.
- Missing costs are never treated as zero; affected totals are labelled incomplete.
- Card and aggregator sales are receivables until settlement is recorded; blank payment methods are not treated as cash.

- The replenishment reserve is money needed to replace what was consumed. It is not a purchase order or an inventory balance.
- Estimated operating result is a profit estimate, not cash available to withdraw.

APPENDIX: METRIC DEFINITIONS

Metric	Definition	Calculation
Sales before discounts	Menu value of all closed orders, including staff meals and complimentary orders, VAT-inclusive, as recorded by the POS.	Sum of Total Sales (paid + refunded orders; voided/open excluded)
of which staff meals (menu value)	Menu value of staff-meal orders. They are fully discounted, so they add no revenue.	Sum of Total Sales where Staff Meal = Yes
of which complimentary (menu value)	Menu value of non-staff orders discounted to zero.	Sum of Total Sales where Sales After Discount = 0 and not a staff meal
Discounts	All discounts including 100% staff and complimentary discounts, VAT-inclusive.	Sum of (Total Sales - Sales After Discount)
Refunds	Amounts refunded to customers per the POS.	Sum of Refunded
Net sales incl. VAT	What customers paid after discounts and refunds.	Sales before discounts - Discounts - Refunds
VAT	Output VAT included in net sales, from the POS VAT/subtotal columns (refunds reduce VAT pro rata). VAT treatment in Settings is not yet confirmed; VAT is shown as recorded by the POS.	Net sales incl. VAT - Net sales ex VAT
Net sales (ex VAT)	Revenue earned by the café, excluding VAT.	Sum of Subtotal After Discount × (1 - Refunded ÷ Sales After Discount)
Ingredient cost – sold items	Recipe ingredients consumed by paid customer orders (discounts do not reduce it). Items with only a total workbook cost are included as unallocated.	Sum of qty served × recipe qty per serving × effective unit cost
Packaging cost – sold items	Packaging used by paid customer orders, once per item sold (combo packaging comes from the combo, not its components).	Sum of qty served × packaging qty × VAT-inclusive unit price
Cost of goods sold	Ingredient + packaging cost of sold items.	Ingredient cost + Packaging cost
Daily batch cost (Cane Karak)	Fixed AED 23 per prepared batch regardless of cups sold; per-cup Karak recipe cost is not charged.	Batches prepared × batch price
Gross profit from sales	Net sales less the cost of what was sold (including the daily batch).	Net sales (ex VAT) - COGS - Daily batch cost
Staff meal consumption	Ingredients and packaging consumed by staff meals (zero revenue).	Sum of recipe cost of staff-meal lines
Complimentary consumption	Ingredients and packaging consumed by complimentary orders (zero revenue).	Sum of recipe cost of complimentary lines
Wastage & prepared refunds/voids	Recorded wastage plus orders that were prepared but refunded in full or voided.	Sum of recipe cost of wastage adjustments + prepared refunded/voided orders
Manual reserve adjustments	Owner-entered consumption amounts.	Sum of manual adjustment amounts
Channel commissions	Aggregator commissions from the effective-dated rates in Settings.	Sum of per app: commission base × rate
Payment fees	Card processing fees from the configured rate. Card fee rate not configured.	Card sales × card fee rate
Fixed operating expense allocation	Included monthly fixed costs spread evenly over the 30 days of the month.	Sum of included monthly amounts ÷ days in month
Estimated operating result	Gross profit less staff meals, complimentary items, wastage, commissions, payment fees and fixed-cost allocation. This is a profit estimate, not cash available. Some consumed items have no cost. Card processing fee rate not configured. Some fixed expenses have no amount.	Gross profit - Staff - Complimentary - Wastage - Manual - Commissions - Payment fees - Fixed costs
Replenishment reserve	Money needed to replace everything consumed today: sold items, staff meals, complimentary items, wastage, batches and manual adjustments, whether paid by cash or card. It is a business-wide requirement, not an amount to remove from the cash drawer.	COGS + batch + staff + complimentary + wastage + manual
Cash received (POS)	Net received on cash-only orders, as recorded by the POS. Not a drawer count.	Sum of Net Received where Payment Method = cash
Card sales (to be settled)	Card receipts recorded by the POS. They become cash only when the bank settlement is recorded in the ledger.	Sum of Net Received where Payment Method = card
Aggregator sales (receivable)	Net sales through delivery apps, receivable until the app settles.	Sum of net sales where Delivery App is set
Split payments (cash/card split unknown)	Orders paid with more than one method; the export does not show each method's amount.	Sum of Net Received where more than one method
Payment method unknown	Money received with no payment method in the POS. Not treated as cash.	Sum of Net Received where Payment Method is blank
